Rupak Thapa

Ingolstadt, Germany • +49 162 3676802 • unknownrupak@gmail.com • iamrupak.com

Professional Summary

UX/UI Designer with 4+ years of experience designing digital products, interfaces, and design systems across web, dashboards, and data-intensive applications. Background in computer science and front-end development, with experience translating complex requirements into clear, usable interfaces. Currently exploring AI-assisted design and development, using generative AI, coding tools, and automation to prototype and iterate more efficiently.

Professional Experience

Product Designer 04/2021 – 01/2025
SAM IT Solutions North Carolina, USA

- Led end-to-end UX/UI redesigns for client websites and digital products
- Developed design systems and high-fidelity prototypes in Figma
- Collaborated with developers and cross-functional teams to translate designs into responsive interfaces
- Created brand identities and digital experiences for clients in IT, hospitality, and industrial automation
- Analyzed website and campaign performance using Google Analytics to inform design and content decisions
- Produced digital assets for web and social media campaigns

UX/UI Designer Intern 10/2020 – 03/2021
Varidx North Carolina, USA

- Designed dashboards for a Smart City platform using live IoT data
- Visualized occupancy data and flood warnings for public-sector applications
- Created user flows, wireframes, and interface concepts within technical constraints
- Collaborated with engineers and stakeholders to define KPIs and data-visualization requirements

Front-end Developer Intern 09/2019 – 12/2019
Guras Technology Kathmandu, Nepal

- Translated Figma mockups into responsive React components
- Optimized web interfaces for performance and cross-browser compatibility

Selected Projects

Morrisville Smart City Dashboard

- Designed a public-facing dashboard for the Town of Morrisville to visualize live IoT data for occupancy monitoring and flood warnings
- Conducted stakeholder interviews and translated requirements into dashboard concepts

AI Clinical Triage System

- Designed an AI-assisted triage prototype exploring how clinical recommendations and reasoning could be presented to nurses
- Tested multiple interface layouts with practitioners and refined the design based on feedback

Delivery Detective

- Designed a process-mining interface that connects on-time delivery performance to root causes and a costed business case
- Built the prototype in React and simplified the workflow so users could understand the analysis without a guided walkthrough

Disaster & Crisis Management App

- Designed mobile workflows for safety-critical tasks
- Conducted usability sessions using SUS, UEQ, and think-aloud methods
- Adapted the interface for Android using Material 3 and AI-assisted prototyping

Remote Scan Support

- Designed a concept for remote MRI experts to support multiple scanner sites while maintaining clear ownership and control
- Built the interaction prototype in React

Part Finder

- Designed a personal React prototype for selecting technical components based on engineering requirements
- Explored ways to surface compatible parts, near-misses, and sample eligibility earlier in the selection process

MoodGen

- Defined the product concept and vibe-coded an AI mood-board generator
- Designed an interaction where users choose a visual direction before generation and can regenerate individual images

Education

Master of Science in User Experience Design 04/2025 – Present
Technische Hochschule Ingolstadt Ingolstadt, Germany

- Human-Computer Interaction, Communication Design, Information Systems Management
- Mobile UX Prototyping, Natural User Interfaces, Design Management, Vibe Coding
- Exploring applications of generative AI in UX research, prototyping, and design workflows

Bachelor of Science in Computer Science and Information Technology 12/2015 – 11/2020
Patan Multiple Campus / Tribhuvan University Lalitpur, Nepal

- Foundations in software engineering, web technologies, and system analysis
- Capstone: Matchmaking platform with recommendation system

Technical Skills

- **UX/UI:** Figma, FigJam, Miro, Information Architecture, User Flows, Design Systems, Prototyping
- **User Research:** Usability Testing, Think-Aloud, SUS, UEQ, User Journey Mapping, Personas
- **Development:** React, HTML/CSS, JavaScript, Responsive Design
- **AI-Assisted Design & Development:** Claude Code, Cursor, Codex, Figma Make, Google Stitch, Relume, AI-assisted prototyping and workflow automation
- **Analytics:** Google Analytics, Excel
- **Adobe:** Photoshop, Illustrator, InDesign, After Effects

Certifications

Google AI Professional Certificate *Google*
Generative AI for UI UX Design *IBM*
UX Design Specialization *Google*
User Experience: Research & Prototyping *UC San Diego*
Digital Skills: User Experience *Accenture*

Languages

- **English:** Professional working proficiency
- **German:** Basic (learning)
